

> 32AV733
HD READY LCD-TV

With diagonal screen size of 81cm or 32" the 32AV733 is the perfect choice for smaller rooms. HD-ready, feature integrated tuners for DVB-T and digital cable TV and even include two HDMI™ connections plus a USB port for photos.

HD
ready

A High Definition (HD) ready TV has a native resolution of 1366x768 pixels and a interlaced resolution of 1920x1080 pixel. He must provide a HDMI or DVI connection with HDCP (=copy protection) support. Furthermore he must be able to display HD-content from any HD-source (for example: BluRay-Player)

HDMI™
HIGH DEFINITION MULTIMEDIA INTERFACE

HDMI™ (High Definition Multimedia Interface) is the high-quality digital interface for pictures and sound. Its high capacity also enables transmission of high-resolution images. Additionally, the reverse channel allows control commands to be transmitted from a remote control to various devices.

USB

Store all your movies, pictures and music on your USB memory stick. Simply plug in and playback via your DVD player. You no longer need to store all your files on DVD's & CD's.
